

DOMAINE D'AUSSIÈRES

AUSSIÈRES ROSACE TERROIR BLEND 2025

Aussières was built on a fertile ecosystem where nature and people come together to learn from each other and create. Our village is very much a living place, where dialogue is the cardinal value. A dialogue of many kinds: between the elements, between the generations that have labored its grounds, between its villagers and craftsmen, and between the wine world's different schools of thought. That is what moves us forward, ultimately creating wines that tell a story of place, respect and nuance.

■ VINEYARD ATTRIBUTES

Appellation : IGP Pays d'Oc, France

The estate is nestled in the rugged hills just behind the Mediterranean coastline of Narbonne, in the South of France.

Terroir : The soils are very shallow and rocky on the slopes, and deeper and sandy on the plain. Yields are voluntarily kept very low in order to preserve the vines and ensure the production of high quality grapes.

The grapes come from flatter, lower lying parts of the estate where the deeper soils with underlying sandsilt provide the optimal growing conditions for grape varieties more associated with the Bordeaux region : Cabernet Sauvignon, Cabernet Franc and Merlot. Blended with Mediterranean grape varieties, they contribute to the wine's complexity.

■ VINTAGE SUMMARY

Winter and early spring brought more rainfall than the two previous vintages. Budbreak went smoothly despite relatively dry conditions and, as early as May, temperatures rose above seasonal averages. Several heatwaves occurred in June, July and August. The intense heat and strong winds made the summer of 2025 particularly scorching, and several wildfires swept through the Corbières massif. Vine growth stopped early, but the grape load remained significant. The thunderstorm of July 14 temporarily revived vine growth, yet the tramontane kept blowing, increasing the vines' water demand. By the end of August, the weather turned humid and heavy, though the grapes remained healthy. Chardonnay harvests began in mid-August, while those for rosé wines started in September. Syrah was harvested during the first half of September, followed by the other red grape varieties.

■ WINE MAKING SCHEME

The grapes are picked at optimal ripeness, destemmed and then vinified using traditional maceration methods. The maceration period varies from 12 to 15 days with gentle extraction and fermentation at fairly low temperatures (around 25°C) in stainless steel vats in order to preserve the wine's full aromatic potential. Ageing is then carried out in vats so as to keep all of the fruit's freshness and purity.

■ TASTING NOTES

Bright ruby colour.

On the nose, black fruit dominate, accompanied by mild spices that evoke the scents of a walk through the garrigue.

The palate combines density and freshness, reflecting the power of the Languedoc sunshine.

TECHNICAL INFORMATION

Varietals : Syrah 47,50%, Grenache noir 17,50%, Marselan 10%, Alicante-henri-bouschet 7%, Carignan 6%, Merlot 5%, Mourvèdre 4%, Cabernet sauvignon 2,50%, Cinsault 0,50%

pH : 3,79

Total acidity : 2,97 g/l
